Art Unit: 1633

In claim 1, lines 2-3, the phrase “a chemically synthesized and strategically designed artificial nucleotide sequence having the” following the phrase “Transcription Activation Module comprising” has been deleted and replaced with the phrase --the nucleotide--.

In claim 1, line 4, the phrase “, and designed to enhance the level of expression of genes in plants” following the phrase “SEQ ID NO:1” has been deleted.

In claim 1, lines 6-7, the phrase “a chemically synthesized and strategically designed artificial” following the phrase “Transcription Initiation Module comprising” has been deleted and replaced with the phrase --the nucleotide--.

#### *Comments*

Claims 8, 9, 11 and 12 claim an invention that is not patentably distinct from that of claims 11-13 of copending Application No. 11/542590. This would be a provisional double patenting rejection since the conflicting claims have not in fact been patented. The MPEP teaches, “If a “provisional” statutory double patenting rejection is the only rejection remaining in one of the applications (but not both), the examiner should withdraw the rejection in that application and permit that application to issue as a patent, thereby converting the “provisional” double patenting rejection in the other application into a double patenting rejection when the application issues as a patent.” Therefore, the double patenting rejection is not made in this application.
